TLM034  
Meesha  
Daat

Toronto producer Meesha delivers his first EP on Thoughtless with 'Daat'. Building on the sound he debuted on Thoughtless Times v.4, the title track is a perfect marriage of classic deep techno elements and the emerging U.K. funky sound, updating the dubstep genre with his crystal clear production and unique aesthetic sensibility. Following a spate of releases on international labels and a burgeoning global profile, Talal & Zoi bring their talents to 'Daat', reconfiguring the original components into an irresistible tech-house groove with a potent arrangement. Bombaman brings the battle to the front lines with his high-impact sound system slayer, designed for nothing less than ultimate peak time play. A third take on 'Daat' comes from New York's Animaltek, who took time out from their busy production schedule to offer up a lush deep house jam that begs for after-hours play with its persuasive low-end – a welcome return after their appearance on Thoughtless Times v.2. Finally, Meesha brings his dub influence to the fore with the subsonic sway and echo chamber synth chords of 'Root', a mesmerizing stepper of oceanic proportions. Thoughtless Music is pleased to present a diverse EP from a selection of gifted young producers...
