Zero to Zero
Swamp Tigress
w/Kero Remix

Just in time for the epic open airs, Eric Downer and Noah Pred join forces once again with their Zero to Zero project to deliver two unapologetic slabs of electro-tinged post-Detroit techno. Leading off, “Swamp Tigress” embodies a predatory feline take on late-night themes: a sleek, muscular bass line prowls for the hunt, flexing its strength with a synthetic snarl to bare razor-sharp percussive fangs - don't look her in the eye, unless, of course, your dance floor could use a good mauling. Det.Und's resident digital maniac Kero delivers a twisted IDM rework that turns atmospheric elements of the original inside-out for an acidic trip to the heart of the tigress' lair. Finally, “Math Puma” embraces a broken beat backbone, employing feral synth lines to hijack the mainframe with covert algebra designed to devour the club. Be nice to the big kittens - they'll purr if you treat them right...
